

Enhance your global triparty processing activities through Broadridge's fixed income post trade engine (*impactsm*)

LEVERAGE AUTOMATION TO GAIN EFFICIENCY IN THE COMPETITIVE AND DYNAMIC TRIPARTY LANDSCAPE

Financial institutions and broker dealers face operational complexity in the competitive and dynamic global non-dollar triparty business. As they pursue their trading and investment strategies while navigating regulatory change, new challenges arise as well as opportunities. Industry regulation has now allowed the option for firms to use a larger base of asset classes to collateralize, creating more optimization within their triparty deals.

By leveraging automation, firms can eliminate time consuming manual processes that lead to inefficiencies and reduce operational risks while growing their business and better utilizing their assets in financing their transactions.

EXPAND YOUR BUSINESS GLOBALLY

ImpactSM Triparty Processing through BNY Mellon Global

- Increases flexibility in Triparty trades by supporting the use of global non-dollar securities as collateral.
- Improves efficiency and saves time via straight through processing between Broadridge's *impact* and BNY Mellon's Integrated Global Triparty platform.
- Reduces operational risks associated with manual processing of Triparty allocations.
- Increases transparency through real time exception management via *impact's* Triparty dashboard.

REDUCE RISK THROUGH AUTOMATED BNY MELLON GLOBAL TRIPARTY VIA BROADRIDGE'S FIXED INCOME POST-TRADE PROCESSING ENGINE

ImpactSM Triparty Processing through BNY Mellon Global enables collateralization with global securities in triparty agreements. This new enhancement in *impact* now allows users to transact with non-dollar securities and to communicate to the BNY Mellon Global Triparty (RE3) platform.

The RE3 system improves the client experience by providing new features and functionality within *impact* to support the Triparty deal life cycle including collateral allocation, management process and termination.

By converging BNY Mellon's Triparty domestic (RE1) and Global (RE3) platforms to both be accessible through *impact*, clients now have a simplified and more efficient operational process to reach their triparty trading and investment objectives.

KEY FEATURES

- Real-time interface to submit deals to BNY Mellon Triparty Global Platform (RE3) by leveraging the existing BNY Mellon Triparty link from *impact*.
- Newly supported global allocation file.
- New Triparty match and exception reports.
