C0. Introduction

C0.1

(C0.1) Give a general description and introduction to your organization.

Broadridge, a Delaware corporation and a part of the S&P 500® Index ("S&P"), is a global financial technology leader providing investor communications and technology-driven solutions to banks, broker-dealers, asset and wealth managers, public companies and mutual funds. With over 50 years of experience, including over 15 years as an independent public company, we provide integrated solutions and an important infrastructure that powers the financial services industry. Our solutions enable better financial lives by powering investing, governance and communications and help reduce the need for our clients to make significant capital investments in operations infrastructure, thereby allowing them to increase their focus on core business activities. We operate our business in two reportable segments: Investor Communication Solutions and Global Technology and Operations.

C0.2

(C0.2) State the start and end date of the year for which you are reporting data and indicate whether you will be providing emissions data for past reporting years.

Reporting year

Start date
July 1 2022

End date
June 30 2023

Indicate if you are providing emissions data for past reporting years
No

Select the number of past reporting years you will be providing Scope 1 emissions data for
<Not Applicable>

Select the number of past reporting years you will be providing Scope 2 emissions data for
<Not Applicable>

Select the number of past reporting years you will be providing Scope 3 emissions data for
<Not Applicable>

C0.3

(C0.3) Select the countries/areas in which you operate.

Australia
Belgium
Brazil
Canada
Czechia
France
Germany
Hong Kong SAR, China
India
Ireland
Italy
Japan
Netherlands
Philippines
Poland
Romania
Singapore
Spain
Sweden
United Kingdom of Great Britain and Northern Ireland
United States of America

C0.4

(C0.4) Select the currency used for all financial information disclosed throughout your response.

USD
(C0.5) Select the option that describes the reporting boundary for which climate-related impacts on your business are being reported. Note that this option should align with your chosen approach for consolidating your GHG inventory.

- Operational control

(C0.8) Does your organization have an ISIN code or another unique identifier (e.g., Ticker, CUSIP, etc.)?

<table>
<thead>

<tr>
<td>Director on board</td>
<td>Currently, our Board of Directors (Board) and our Governance and Nominating Committee of our Board oversee Broadridge’s ongoing commitment to environmental, social, and governance matters relevant to Broadridge (ESG Matters). In addition, two of Broadridge’s board members have been deemed to have competence on climate-related issues. Our management-led ESG Committee reports to the Governance and Nominating Committee and full Board on ESG Matters. The ESG Committee also assists the senior management of Broadridge in (a) setting general strategy relating to ESG Matters, (b) developing, implementing, and monitoring initiatives and policies based on that strategy, (c) overseeing communications with associates, investors, and stakeholders with respect to ESG Matters, and (d) monitoring and assessing developments relating to, and improving Broadridge’s understanding, of ESG Matters. The ESG Committee is responsible for reviewing both internal and external targets, metrics, and goals related to ESG. For example, the ESG Committee is currently reviewing and developing a plan to reach net zero greenhouse gas emissions by the year 2050. In addition, the ESG Committee is also working to seek validation of near- and long-term emissions reduction targets by the Science Based Targets initiative by May 2024. We have also reviewed our climate-related initiatives and goals with the Governance and Nominating Committee of the Board and the full Board.</td>

Eileen K. Murray was appointed to our Board in 2022. She is a member of the Audit Committee and the Governance and Nominating Committee. Ms. Murray is the former Chair of the Board of Governors of the Financial Industry Regulatory Authority where she served from 2018 through 2022. She was the Co-Chief Executive Officer of Bridgewater Associates, L.P. (“Bridgewater”), one of the world’s largest institutional asset managers, from 2009 to 2020. Prior to joining Bridgewater, she was the CEO of Investment Risk Management LLC and President and Co-CEO of Duff Capital Advisors. Ms. Murray began her professional career in 1984 at Morgan Stanley, where she held several senior positions from 1984 to 2002, including Controller, Treasurer, and Chief Accounting Officer, as well as Chief Operating Officer for the firm’s Institutional Securities Group. From 2002 to 2005, she was a Managing Director at Credit Suisse and served on the firm’s management board. Ms. Murray has also served as a director of the Business Council for International Understanding and The Depository Trust & Clearing Corporation and has been a director of the Irish Arts Center since 2016. She is also an advisor to many innovative technology and environmental solutions companies, including Invisible Urban Charging, an electric car charging company, Green Trust Partners, LLC, an ESG-focused real estate fund, and Consensys, a blockchain technology company.

C2.1b

(C2.1b) How does your organization define substantive financial or strategic impact on your business?

The responsibilities of the Board include oversight of the Company’s risk management processes. The Board has two primary methods of overseeing risk. The first method is through the Company’s Enterprise Risk Management (ERM) process which allows for full Board oversight of the most significant risks facing the Company. The second is through the functioning of the Board’s committees to which the Board has delegated oversight responsibilities of specific areas of risk such as cybersecurity and human capital management based on their relevance to the subject matter of the committee. Management presents on the ERM program to the full Board annually and also provides the Board with quarterly updates on the Company’s risk program and activities. In addition, at each quarterly Audit Committee meeting, management presents on the ERM program highlighting a key risk topic, including legal and compliance risks, client and strategy risks, and systems and operations risks.

Management established the ERM process to ensure a complete Company-wide approach to risk over five distinct but overlapping core areas:

- **STRATEGIC:** the risks that could impede the Company from achieving its strategic vision and goals
- **FINANCIAL:** the risks related to maintaining accurate financial statements, and timely and complete financial disclosures
- **OPERATIONAL:** the risks in the processes, people, and technology the Company employs to achieve its strategy, normal business operations and cybersecurity
- **COMPLIANCE:** the risks related to the Company’s legal and regulatory compliance requirements and violations of laws
- **REPUTATIONAL:** the risks that impact the Company’s reputation including failing to meet the expectations of its clients, investors, employees, regulators, or the public

In addition, Broadridge has an established and mature business continuity program where business units maintain comprehensive disaster recovery and business continuity plans, which ensure the timely and effective recovery of mission-critical business functions in the event of a disaster. Our business continuity plans have been developed based on industry best practices and guidelines of the Disaster Recovery Institute International; and our program is staffed with full-time, highly qualified disaster recovery and BCP professionals.

The foundation of our disaster recovery and business continuity strategy focuses on risk mitigation and disaster avoidance wherever possible. Our strategy includes power protection, facility security, and data and infrastructure backups. Our business continuity plans have been developed to:

- Provide an organized and consolidated approach to managing response and recovery activities following any unplanned incident or business interruption.
- Provide clear and time-sensitive communication to all stakeholders including our employees and our customers.
- Provide prompt and appropriate response to any unplanned incident, such as fire, regional disasters, pandemic, or loss of utilities services, thereby reducing the impacts resulting from short-term business interruptions.
- Recover essential business operations in a timely manner, increasing the ability of the company to recover from a damaging loss to a facility.
- Provide a smooth transition back to the primary production facility after the incident has been resolved.
- Provide disaster recovery planning that includes activities and plans to recover and restore the ongoing function of technology and infrastructure in the event of a disaster/disruptive event. Recovery includes voice and data networks, computer hardware, software systems, and applications.

Our Broadridge Crisis Management Team is comprised of cross-functional senior-level leaders who manage the overall response to an incident and provide centralized command and control in the event of a disaster/disruptive event. At Broadridge, business continuity planning is a continuous process, not a project. Testing and review of the plans with recovery team members are required annually and when material changes have been made to the plans. The BCP Program includes ongoing emergency planning with local, state, and federal authorities to ensure the safety of human life and to minimize disruption of service to our clients.

Our current ERM framework and BCP programs address applicable and material climate-related issues.

C2.2
(C2.2) Describe your process(es) for identifying, assessing and responding to climate-related risks and opportunities.

**Value chain stage(s) covered**

Downstream

**Risk management process**
Integrated into multi-disciplinary company-wide risk management process

**Frequency of assessment**
More than once a year

**Time horizon(s) covered**
Short-term
Medium-term
Long-term

**Description of process**
Broadridge approaches climate-related risks and opportunities in the same way that it addresses other risks and opportunities. From a risk perspective, we annually assess our risks in the context of producing our risk factor disclosures, our ERM program and our BCP programs. From an opportunity perspective, our business leaders are constantly looking for opportunities that can help us grow our business, further our ESG goals, and address the interests of our key stakeholders (associates, clients, investors, and the communities in which we operate).

We have an ERM program that annually assesses our enterprise risks. This program is overseen by our risk committee comprised of senior executives, including our President, Chief Financial Officer, Chief Legal Officer, Corporate Secretary, Chief Compliance Officer, and includes representatives of various functions across the Company. It is led by an ERM Program Manager who leads a review of the top risks across the enterprise. The goal of the ERM process is to provide an ongoing procedure, effected at all levels of the Company across each business unit and corporate function, to identify and assess risk, monitor risk, and agree on mitigating action. As part of this annual review, the management-led risk committee considers what the material risks are for the Company, and ranks those risks relative to each other. Risks relating to business interruption risks due to the impact of climate change and emerging regulations are subject to this annual process, in the context of the Company’s top risks. In addition to the ERM process, we had conducted a risk materiality analysis and specifically considered climate risks in the context of an assessment of our material ESG issues. That process involved asking all of the members of our Executive Leadership Team and business and functional leaders to identify the top risks and opportunities across the Company, based on a range of more than 25 topics.

Much like risks, any climate opportunities are incorporated into our regular course process of assessing business opportunities. Specifically, our business leaders are continuously looking for opportunities to grow our business, reduce costs and serve the needs of our stakeholders. We are well positioned to lead in the connection between digital-first products and environmental sustainability. Our ever-expanding innovative products help our clients lower their environmental footprints within the traditional “take, make, and throw away” model in order to reduce waste and mitigate GHG emissions. Our Investor Communication Solutions business identified a number of climate and ESG-related opportunities, including specific opportunities to help public companies, mutual funds, and investors assess and address climate-related risks and opportunities. For public companies, for example, we have introduced a number of products as a result of this assessment. These products include our Virtual Shareholder Meeting solutions, our ESG consulting services, and our ESG Analyzer disclosure database, to name a few. Each of these products was developed following an assessment by the business of the specific needs of public companies and mutual funds as well as investors with respect to climate and other ESG matters.

We also offer numerous e-delivery products that replace our paper communications as well as suppression methods that decrease mailed paper volumes. For example, one of our major efforts has been to reduce the use of paper for communications by public companies and mutual funds. We are also researching and developing other products and services that increase levels of efficiency and sustainability.

Broadridge also monitors applicable regulations and disclosure requirements, such as the proposed SEC climate disclosure rules. Our facilities and regulatory teams also assess compliance with regulations applicable to our facilities and monitor potential state climate-related reporting and transparency requirements. We continuously look to improve our operational efficiencies while also reducing our carbon footprint through our responsible and eco-friendly supply chain.

The Governance and Nominating Committee of our Board oversees Broadridge’s ongoing commitment to ESG matters relevant to Broadridge. In addition, our ESG Committee assists the senior management of Broadridge in (a) setting general strategy relating to ESG matters, (b) developing, implementing and monitoring initiatives and policies based on that strategy, (c) overseeing communications with associates, investors, and stakeholders with respect to ESG matters, and (d) monitoring and assessing developments relating to, and improving Broadridge’s understanding of, ESG matters. Our Chief Legal Officer reports on the activities of the ESG Committee to the Governance and Nominating Committee regularly. In addition, the ESG Committee and President provide annual ESG updates to the Governance and Nominating Committee and the full Board.

See also our response to C2.1b for more detail regarding our ERM framework and BCP programs.

---

C2.2a
(C2.2a) Which risk types are considered in your organization's climate-related risk assessments?

<table>
<thead>
<tr>
<th>Relevance &amp; Inclusion</th>
<th>Please explain</th>
</tr>
</thead>
<tbody>
<tr>
<td>Current regulation</td>
<td>Relevant, always included</td>
</tr>
<tr>
<td></td>
<td>Risks related to compliance with facility-based regulations are current regulations on Broadridge’s radar. As such, our VP, Facilities and Real Estate and local office managers monitor and manage compliance of our North American facilities with applicable environmental laws, including wastewater management, diesel fuel and air emissions, and OSHA standards for air and water quality. Our facility located in Markham, Ontario has been subject to a Canadian federal carbon tax since 2019. The carbon charges apply to fossil fuels which includes gasoline and natural gas. Our offices and operations located in the United Kingdom are subject to the Energy Savings Opportunity Scheme, Streamlined Energy and Carbon Reporting and a Climate Change Levy.</td>
</tr>
<tr>
<td>Emerging regulation</td>
<td>Relevant, always included</td>
</tr>
<tr>
<td></td>
<td>Broadridge has governance processes in place monitoring all SEC regulations and disclosure requirements, and we are aware of the SEC’s proposed climate-related disclosure rules and expected date of final rules adoption in October 2023. Once the final rules are adopted, we will work on preparing our disclosures. In addition, states including New York, where our Edgewood facilities are located, may adopt carbon reduction goals that could apply to our businesses. This could result in additional taxes, higher costs, and potential fines for our businesses if we do not adhere to applicable state regulations.</td>
</tr>
<tr>
<td>Technology</td>
<td>Relevant, always included</td>
</tr>
</tbody>
</table>
|                       | A consulting firm has worked with us to institute energy management systems to regulate the temperatures in our buildings and ensure that our HVAC systems operate efficiently. Now we pre-set parameters and institute program setbacks so that our systems power down or the heat/A/C turns off in a building during certain times of the day or year. In the last several years we have replaced energy intensive HVAC units with high-efficiency HVAC units in all of our North American facilities.
|                       | In recent years, we replaced nearly all of our continuous form toner-based printers with more energy-efficient inkjet printers. Because inkjet printers have significantly more capacity than toner-based printers, we are able to produce more output in a smaller footprint. The inkjet printers also use substantially less energy than toner-based printers. As a result of the use of inkjet technology, we now require less air conditioning capacity to cool the print rooms.
|                       | Most of our production printers use dye-based ink which requires less drying than other similar inks, such as pigment. As drying is the most energy intensive process, the use of dye-based ink requires less drying results in decreased energy use in the drying process. At Broadridge, we also work with our printer manufacturers to buy bulk ink drums and pallet sized totes to minimize packaging waste and shipping which also helps us minimize our carbon footprint. |
| Legal                 | Relevant, always included |
|                       | Increased compliance costs, reporting requirements, claims, and litigation could have an impact on Broadridge. We currently do not have any material environmental-related litigation and do not anticipate any in the near future. |
| Market                | Relevant, always included |
|                       | We are well positioned to lead in the connection between digital-first communications solutions and environmental sustainability. Our ever-expanding innovative products help our clients lower their environmental footprints within the traditional “take, make, and throw away” model in order to reduce waste and mitigate GHG emissions. We offer numerous e-delivery products that replace our paper communications as well as suppression methods that decrease mailed paper volumes. Our solutions, such as Virtual Shareholder Meetings, Digital Proxy, Regulatory Mutual Fund Communications, and the Broadridge Customer Communications Cloud, and digitization of processes resulting from shifts in ways of working, promote sustainability within the linear supply chain model by reducing resource input and waste output. |
| Reputation            | Relevant, always included |
|                       | We continue to focus on enhancing our climate performance and disclosure. We are developing a plan to reach net zero greenhouse gas (GHG) emissions by the year 2050. We are planning to set a date at which we will achieve this goal, including a near-term target validated by the Science Based Target Initiative (SBTi), backed by a comprehensive approach to develop detailed emission reduction roadmaps. Importantly, Broadridge’s targets will go beyond Scopes 1 and 2 emissions to include its largest indirect Scope 3 emissions. In addition, we have disclosed our climate-related risks and opportunities in this report and obtained independent third-party assurance of our Scope 1, 2, and top Scope 3 emissions as shown in section C10 Verification, below. |
| Acute physical        | Relevant, always included |
|                       | Acute physical risk is continually relevant and included in our risk analysis due to potential disruption to operations from climate-related incidents. Per the Intergovernmental Panel on Climate Change (IPCC), hurricanes in parts of the Northeast U.S. and Canada, and wildfires and droughts in California are possible climate-driven physical risks. These risks may result in business or operational interruptions.
|                       | Our large Indian offices are located in Bangalore and Hyderabad, monsoon-prone areas. In the case of heavy rain and surface winds, there may be water logging or seepage that could damage our Indian offices and related infrastructure. Our Edgewood offices and printing facilities are located in areas which may be subject to hurricanes and wildfires.
|                       | Due to the possibility of these acute climate events, we have robust business continuity planning programs in place. Our business units have established and maintain comprehensive disaster recovery and business continuity planning programs, which ensure the timely and effective recovery of mission-critical business functions in the event of a disaster. Our business continuity plans have been developed based on guidelines of the Disaster Recovery Institute International, and our program is staffed with full-time, highly qualified disaster recovery and business continuity planning professionals. |
| Chronic physical      | Relevant, always included |
|                       | Global warming is a chronic physical risk affecting our properties globally. Our Indian offices and certain North American facilities are subject to water stress and certain of our US and Canadian facilities are also subject to risks resulting from a rise in sea level and rise in temperatures. These chronic physical risks can result in increased running hours of generators and HVAC systems which may lead to high diesel, power, and water consumption. These physical risks can also create health and safety risks for our employees. |

C2.3

(C2.3) Have you identified any inherent climate-related risks with the potential to have a substantive financial or strategic impact on your business?

Yes

C2.3.a

(C2.3a) Provide details of risks identified with the potential to have a substantive financial or strategic impact on your business.

**Identifier**

**Risk 1**

**Where in the value chain does the risk driver occur?**

Direct operations

**Risk type & Primary climate-related risk driver**

Acute physical

Cyclone, hurricane, typhoon

**Primary potential financial impact**

Increased indirect (operating) costs

**Climate risk type mapped to traditional financial services industry risk classification**

<Not Applicable>

**Company-specific description**

Our large Indian offices are located in Bangalore and Hyderabad, monsoon-prone areas. In the case of heavy rain and surface winds, there may be water logging or
seepage as well as prolonged grid power outages that could damage our Indian offices, related infrastructure and utilities systems. We believe Broadridge’s backup diesel generators at our India facilities are sufficient to address this risk.

Time horizon
Long-term

Likelihood
Unlikely

Magnitude of impact
Low

Are you able to provide a potential financial impact figure?
Yes, an estimated range

Potential financial impact figure (currency)
$2,338,000

Potential financial impact figure – minimum (currency)
0

Potential financial impact figure – maximum (currency)
$2,369,400

Explanation of financial impact figure
Damage to the utilities system such as chillers, diesel generators and building infrastructure and prolonged state grid power outage may be experienced. Repair and maintenance for office infrastructure might include seepage arrest, overhauling of utility machines, water logging clearance with help of sump pump, additional housekeeping manpower, water leakage treatment, clearing of drainage system and restoration of damaged infrastructure.

Cost of response to risk
$0

Description of response and explanation of cost calculation
We believe Broadridge backup diesel generators at our India facilities are sufficient to address this risk. As these generators are already in place, at this time, we do not believe that any additional costs affiliated with the response to this risk are needed.

Where in the value chain does the risk driver occur?
Direct operations

Risk type & Primary climate-related risk driver

| Acute physical | Cyclone, hurricane, typhoon |

Primary potential financial impact
Increased indirect (operating) costs

Climate risk type mapped to traditional financial services industry risk classification
<Not Applicable>

Company-specific description
Hurricanes, fires, snowstorms and flooding, although rare, can pose a potential risk to operations at our Edgewood, NY location. Historically, very few hurricane warnings materialized into actual hurricanes. Occasional fires occur in surrounding areas which have created health risks. Snowstorms can impact commuting and transit routes. The Edgewood site may also be subject to flooding. None of the above have had a material impact on our Edgewood operations. On occasion, installed flood pumps at our Edgewood site are used to address flood risks and heavy rainfall. These pumps are already built into the cost of operations.

Time horizon
Long-term

Likelihood
Unlikely

Magnitude of impact
Low

Are you able to provide a potential financial impact figure?
Yes, an estimated range

Potential financial impact figure (currency)
$115,000

Potential financial impact figure – minimum (currency)
0

Potential financial impact figure – maximum (currency)
$115,000
Explaination of financial impact figure
If such events occur, we may experience damage to our infrastructure as well business and operational interruptions due to power outages. Fiscal year 2023 data across our three Edgewood facilities/offices showed diesel fuel backup generator fuel costs averaging $6.36 per gallon and we purchased approximately 11,400 gallons of diesel fuel. We ran our back-up generators for 18 hours due to unplanned utility outages this fiscal year. Edgewood's preventative maintenance annual generator costs for this same period reached over $46,000. Preventative maintenance costs might include checking oil and inspecting potential oil leaks, filter changes, test runs, battery and engine checks and other tasks. We have estimated the annual cost to run back-up diesel generators in the event of an acute climate impact at up to $115,000 based on both diesel backup generator diesel fuel purchases and preventative maintenance costs across fiscal year 2023. This will vary based on the number of days of outages, diesel fuel costs and generator leakages or other events.

Cost of response to risk
0

Description of response and explanation of cost calculation

Company-specific description
Broadridge has a large printing production facility in El Dorado County, CA located within 90 minutes of the El Dorado National Forest where wildfires have occurred due to droughts. Prolonged fire seasons (May-November) due to California droughts create drier conditions and increase the risk of County/State fires and poor air quality due to smoke contamination. As a result of poor air quality, risks include temporary staffing reductions and operating expense increases for building maintenance (e.g. HVAC equipment increased filter changes).

According to the National Integrated Drought Information System (NIDIS) a continued focus on water conservation measures and fire prevention efforts will need to be maintained. California has experienced a severe 3-year drought period, with the majority of 2022 being rated a Severe Drought condition and 45% of El Dorado County at stage D3-Extreme Drought conditions. We are expecting state-wide water conservation efforts along with expected increased operating expenses due to higher water costs.

Time horizon
Long-term

Likelihood

Are you able to provide a potential financial impact figure?
Yes, an estimated range

Potential financial impact figure (currency)
<Not Applicable>

Potential financial impact figure – minimum (currency)
0

Potential financial impact figure – maximum (currency)
35000

Explanation of financial impact figure
If such events occur, we may experience damage to our infrastructure as well business and operational interruptions due to power outages. Fiscal year 2023 data for our El Dorado Hills facility showed diesel fuel backup generator fuel costs averaging $4.75 per gallon and we purchased approximately 3,800 gallons of diesel fuel. We ran our back-up generators for 3 hours due to unplanned utility outages this fiscal year. El Dorado Hill's preventative maintenance annual generator costs for this same period reached over $17,300. Preventative maintenance costs might include checking oil and inspecting potential oil leaks, filter changes, test runs, battery and engine checks and other tasks. We have estimated the annual cost to run back-up diesel generators in the event of an acute climate impact at up to $35,000 based on both diesel backup generator diesel fuel purchases and preventative maintenance costs across fiscal year 2023. This will vary based on the number of days of outages, diesel fuel costs and generator leakages or other events.

Cost of response to risk
0

Description of response and explanation of cost calculation
Prevention efforts we have put in place at our El Dorado Hills facility include 24x7 on-site security and external cameras for visual inspections, complete building fire systems with fire pumps for warehouse paper storage tested per NFPA 25 guidelines, ongoing communication with the local fire department, landscape fire break maintenance, and an emergency response program. Hydrants are onsite with a local fire station 1 mile from the facility. The El Dorado Hills Fire District enforces the California state law which extends the defensible space clearance around homes and structures from 30 feet to 100 feet. Broadridge maintains the required defensible clearance space around the facility’s property line. Our continued participation in annual testing of Broadridge’s business continuity plan with tabletop exercises and joint site exercises also increases our effective risk response.

Company-specific description
Broadridge technologies and processing — with and on behalf of broker-dealers, custodian banks, public companies, and fund companies — drove digital proxy delivery during our 2023 fiscal year. As a result, public companies and funds saved an estimated $1.4 billion over the 2023 fiscal year on printing and postage costs in connection with our digital proxy and alternative delivery services. This assumed that 77% of the suppressed mailings were notice mailings versus full package mailings based on proxy distributions data processed in the US for fiscal year 2022 and based on average USPS standard mail delivery rates for all mailings for fiscal year 2023. This reduced the environmental impact of printing and mailing hard copy communications and drove down Scope 3 GHG emissions (covering indirect emissions over the proxy delivery supply chain). We estimate that our digital proxy and alternative delivery services (excluding householding suppressions) have resulted in annual CO2e savings of 397,558 metric tons for the fiscal year 2023 across our US-based deliveries.

C3.2b
(C3.2b) Provide details of the focal questions your organization seeks to address by using climate-related scenario analysis, and summarize the results with respect to these questions.

Row 1

Focal questions
What are the most significant climate risks and opportunities facing Broadridge from a transition risk standpoint?
What are the most significant climate risks facing Broadridge from a physical risk standpoint?
Are there any climate risks that are being overlooked in current planning processes?
How can we continually improve our risk management process to further incorporate climate risk?
How can we best incorporate climate risk into broader strategy?

Results of the climate-related scenario analysis with respect to the focal questions
As a result of our climate scenario analysis, we have improved our assessment of potential climate-related impacts and risks, in particular, the potential financial impacts to our India offices and North American facilities, due to adverse weather events in the future. With our analysis, we have been able to engage with our sites to bring an elevated awareness and understanding about potential impacts.

Additionally, our analysis has been able to identify potential opportunities. We pride ourselves in pursuing opportunities for economic growth that simultaneously align with doing good for the environment. Our biggest opportunity to lower greenhouse gas (GHG) emissions is through the services we perform on behalf of our clients—by driving digitalization and reducing paper mailing materials. We are committed to helping our clients through our smart supply-chain management, while also improving our own energy consumption and waste production behaviors.

| Annual monetary savings (unit currency – as specified in C0.4) | 173525 |
| Investment required (unit currency – as specified in C0.4) | 4071179 |
| Payback period | 11-15 years |
| Estimated lifetime of the initiative | >30 years |

**Comment**
In 2016, we acquired our El Dorado Hills printing production operation, which included a 0.8 MW PV solar energy system. We also entered into a Net Energy metering agreement with a local utility in 2012 through our El Dorado Hills facility. This allows us to export solar power to support the area’s energy grid during peak usage while crediting us at higher peak and partial-peak rates. We are able to save costs and use credits when the solar is offline.

Comment
We have installed high-efficiency rooftop HVAC units in our Edgewood, New York facilities. In an ongoing effort to install and replace high-efficiency rooftop HVAC units, the savings and investment detailed above account for all high-efficiency rooftop HVAC units installed since July 2021 in our Edgewood, New York facilities. In fiscal year 2023 alone we replaced two HVAC units.

C5.3

(C5.3) Select the name of the standard, protocol, or methodology you have used to collect activity data and calculate emissions.

C6. Emissions data

C6.1

(C6.1) What were your organization’s gross global Scope 1 emissions in metric tons CO2e?
Reporting year
Gross global Scope 1 emissions (metric tons CO2e)
12468
Start date
<Not Applicable>
End date
<Not Applicable>
Comment
This 2023 CDP Report reflects data from July 1, 2022 through June 30, 2023 to align with the company’s fiscal year and with operational control approach. Additionally, we align with the GHG Protocol. Our 2023 CDP Report also captures company-wide Broadridge offices, facilities, and data centers.

C6.2
(C6.2) Describe your organization’s approach to reporting Scope 2 emissions.

Row 1
Scope 2, location-based
We are reporting a Scope 2, location-based figure

Scope 2, market-based
We have no operations where we are able to access electricity supplier emission factors or residual emissions factors and are unable to report a Scope 2, market-based figure

Comment
We are actively reaching out to our biggest electricity providers to collect market-based emissions and we will update our future CDP questionnaires in line with this.

C6.3

(C6.3) What were your organization’s gross global Scope 2 emissions in metric tons CO2e?

Reporting year
Scope 2, location-based
3819

Scope 2, market-based (if applicable)
<Not Applicable>

Start date
<Not Applicable>

End date
<Not Applicable>

Comment
This 2023 CDP Report reflects data from July 1, 2022 through June 30, 2023 to align with the company’s fiscal year and with operational control approach. Additionally, we align with the GHG Protocol. Our 2023 CDP Report also captures company-wide Broadridge offices, facilities, and data centers.

C6.4

(C6.4) Are there any sources (e.g. facilities, specific GHGs, activities, geographies, etc.) of Scope 1, Scope 2 or Scope 3 emissions that are within your selected reporting boundary which are not included in your disclosure?

No

C6.5

(C6.5) Account for your organization’s gross global Scope 3 emissions, disclosing and explaining any exclusions.

Purchased goods and services
Evaluation status
Relevant, calculated

Emissions in reporting year (metric tons CO2e)
56788

Emissions calculation methodology
Spend-based method

Percentage of emissions calculated using data obtained from suppliers or value chain partners
100

Please explain
This category was calculated using the spend based method for Purchased goods and services spend items within the Broadridge General Ledger with emissions factors applied using the GHG Protocol/Quantis Scope 3 evaluator tool.

Capital goods
Evaluation status
Not relevant, calculated

Emissions in reporting year (metric tons CO2e)
1584

Emissions calculation methodology
Spend-based method

Percentage of emissions calculated using data obtained from suppliers or value chain partners
100

Please explain
This category was calculated using the spend based method for Capital Goods spend items within the Broadridge General Ledger with emissions factors applied utilizing the GHG Protocol/Quantis Scope 3 evaluator tool.
Fuel-and-energy-related activities (not included in Scope 1 or 2)

Evaluation status
Not relevant, calculated

Emissions in reporting year (metric tons CO2e)
10743

Emissions calculation methodology
Spend-based method

Percentage of emissions calculated using data obtained from suppliers or value chain partners
100

Please explain
This category was calculated utilizing the GHG Protocol/Quantis Scope 3 evaluator tool.

Upstream transportation and distribution

Evaluation status
Not relevant, calculated

Emissions in reporting year (metric tons CO2e)
3159

Emissions calculation methodology
Spend-based method

Percentage of emissions calculated using data obtained from suppliers or value chain partners
100

Please explain
This category was calculated utilizing the GHG Protocol/Quantis Scope 3 evaluator tool.

Waste generated in operations

Evaluation status
Not relevant, calculated

Emissions in reporting year (metric tons CO2e)
1169

Emissions calculation methodology
Spend-based method

Percentage of emissions calculated using data obtained from suppliers or value chain partners
100

Please explain
This category was calculated utilizing the GHG Protocol/Quantis Scope 3 evaluator tool.

Business travel

Evaluation status
Not relevant, calculated

Emissions in reporting year (metric tons CO2e)
4933

Emissions calculation methodology
Spend-based method

Percentage of emissions calculated using data obtained from suppliers or value chain partners
100

Please explain
This category was calculated using data actuals from Broadridge air and train travel as well as hotel bookings.

Employee commuting

Evaluation status
Not relevant, calculated

Emissions in reporting year (metric tons CO2e)
6290

Emissions calculation methodology
Spend-based method

Percentage of emissions calculated using data obtained from suppliers or value chain partners
100

Please explain
This category was calculated using the number of Broadridge employees with emissions factors applied utilizing the GHG Protocol/Quantis Scope 3 evaluator tool.
Upstream leased assets

Evaluation status
Not relevant, calculated

Emissions in reporting year (metric tons CO2e)
0

Emissions calculation methodology
Spend-based method

Percentage of emissions calculated using data obtained from suppliers or value chain partners
100

Please explain
This category was determined to be de minimis.

Downstream transportation and distribution

Evaluation status
Relevant, calculated

Emissions in reporting year (metric tons CO2e)
710186

Emissions calculation methodology
Spend-based method

Percentage of emissions calculated using data obtained from suppliers or value chain partners
100

Please explain
This category was calculated using the spend based method for downstream transportation and distribution spend items within the Broadridge General Ledger with emissions factors applied utilizing the GHG Protocol/Quantis Scope 3 evaluator tool.

Processing of sold products

Evaluation status
Not relevant, calculated

Emissions in reporting year (metric tons CO2e)
0

Emissions calculation methodology
Spend-based method

Percentage of emissions calculated using data obtained from suppliers or value chain partners
100

Please explain
This category was determined to be de minimis.

Use of sold products

Evaluation status
Not relevant, calculated

Emissions in reporting year (metric tons CO2e)
0

Emissions calculation methodology
Spend-based method

Percentage of emissions calculated using data obtained from suppliers or value chain partners
100

Please explain
This category was determined to be de minimis.

End of life treatment of sold products

Evaluation status
Not relevant, calculated

Emissions in reporting year (metric tons CO2e)
14933

Emissions calculation methodology
Spend-based method

Percentage of emissions calculated using data obtained from suppliers or value chain partners
100

Please explain
This category was calculated using weight of paper distributed to customers in a 12-month period with emissions factors applied utilizing the GHG Protocol/Quantis Scope 3 evaluator tool.
Downstream leased assets

Evaluation status
Not relevant, calculated

Emissions in reporting year (metric tons CO2e)
11721

Emissions calculation methodology
Spend-based method

Percentage of emissions calculated using data obtained from suppliers or value chain partners
100

Please explain
This category was calculated using the leased square footage of all Broadridge subleased spaces with emissions factors applied utilizing the GHG Protocol/Quantis Scope 3 evaluator tool.

Franchises

Evaluation status
Not relevant, calculated

Emissions in reporting year (metric tons CO2e)
0

Emissions calculation methodology
Spend-based method

Percentage of emissions calculated using data obtained from suppliers or value chain partners
100

Please explain
This category was determined to be de minimis.

Investments

Evaluation status
Not relevant, calculated

Emissions in reporting year (metric tons CO2e)

(C6.7) Are carbon dioxide emissions from biogenic carbon relevant to your organization?
No

(C6.10) Describe your gross global combined Scope 1 and 2 emissions for the reporting year in metric tons CO2e per unit currency total revenue and provide any additional intensity metrics that are appropriate to your business operations.

Intensity figure
0.0000088625

Metric numerator (Gross global combined Scope 1 and 2 emissions, metric tons CO2e)
50597

Metric denominator
unit total revenue

Metric denominator: Unit total
5709100000

Scope 2 figure used
Location-based

% change from previous year
10.34

Direction of change
Decreased

Reason(s) for change
Other emissions reduction activities
Change in output

Please explain
Our total Scope 1 decreased year-over-year due to a reduction in on-site fuel consumption. Our total Scope 2 increased year-over-year due to a change in output and increased revenue for the company overall.

C7. Emissions breakdowns

C7.1

(C7.1) Does your organization break down its Scope 1 emissions by greenhouse gas type?
Yes

C7.1a

(C7.1a) Break down your total gross global Scope 1 emissions by greenhouse gas type and provide the source of each used greenhouse warming potential (GWP).

### C7.7

**(C7.7) Is your organization able to break down your emissions data for any of the subsidiaries included in your CDP response?**

No

### C7.9

**(C7.9) How do your gross global emissions (Scope 1 and 2 combined) for the reporting year compare to those of the previous reporting year?**

Increased

### C7.9a
(C7.9a) Identify the reasons for any change in your gross global emissions (Scope 1 and 2 combined), and for each of them specify how your emissions compare to the previous year.

<table>
<thead>
<tr>
<th>Change in emissions (metric tonnes CO2e)</th>

C7.9b

(C7.9b) Are your emissions performance calculations in C7.9 and C7.9a based on a location-based Scope 2 emissions figure or a market-based Scope 2 emissions figure?

Location-based

C8. Energy

C8.1

(C8.1) What percentage of your total operational spend in the reporting year was on energy?

More than 0% but less than or equal to 5%

C8.2

(C8.2) Select which energy-related activities your organization has undertaken.

<table>
<thead>
<tr>
<th>Indicate whether your organization undertook this energy-related activity in the reporting year</th>

C10.2

(C10.2) Do you verify any climate-related information reported in your CDP disclosure other than the emissions figures reported in C6.1, C6.3, and C6.5?
No, but we are actively considering verifying within the next two years

C11. Carbon pricing

C11.1

(C11.1) Are any of your operations or activities regulated by a carbon pricing system (i.e. ETS, Cap & Trade or Carbon Tax)?
No, and we do not anticipate being regulated in the next three years

C11.2

(C11.2) Has your organization canceled any project-based carbon credits within the reporting year?
No

C11.3

(C11.3) Does your organization use an internal price on carbon?
No, and we do not currently anticipate doing so in the next two years

C12. Engagement

C12.1

(C12.1) Do you engage with your value chain on climate-related issues?
Yes, our suppliers
Yes, our customers/clients
Yes, other partners in the value chain

C12.1a
(C12.1a) Provide details of your climate-related supplier engagement strategy.

**Type of engagement**
Other, please specify (Compliance with internal policy)

**Details of engagement**
Other, please specify (We have a Vendor Code of Conduct that we use commercially reasonable efforts to include in every vendor contract. The Vendor Code of Conduct is a key part of implementing our strategy to select vendors with sound environmental management principles.)

**% of suppliers by number**
100

**% total procurement spend (direct and indirect)**
100

**% of supplier-related Scope 3 emissions as reported in C6.5**
0

**Rationale for the coverage of your engagement**
We have a Vendor Code of Conduct (available at https://www.broadridge.com/legal/vendor-code-of-conduct) that we use commercially reasonable efforts to include in every vendor contract. Such code reflects the minimum standards by which we expect all vendors to follow in providing goods and/or services to Broadridge, and states the following: “Broadridge expects Vendor to support sound environmental management principles and reduce Vendor’s impact on the environment within which Vendor operates. Vendor must comply with all laws relating to the protection of the environment which relate to Vendor’s business. Vendor must also have a written sustainability/environmental policy appropriate to the size and nature of Vendor’s operations.” The Vendor Code of Conduct is a key part of implementing our strategy to select vendors with sound environmental management principles.

**Impact of engagement, including measures of success**
We have a Vendor Code of Conduct (available at https://www.broadridge.com/legal/vendor-code-of-conduct) that we use commercially reasonable efforts to include in every vendor contract. Such code reflects the minimum standards by which we expect all vendors to follow in providing goods and/or services to Broadridge, and states the following: “Broadridge expects Vendor to support sound environmental management principles and reduce Vendor’s impact on the environment within which Vendor operates. Vendor must comply with all laws relating to the protection of the environment which relate to Vendor’s business. Vendor must also have a written sustainability/environmental policy appropriate to the size and nature of Vendor’s operations.” The Vendor Code of Conduct is a key part of implementing our strategy to select vendors with sound environmental management principles.

**Comment**

(C12.1b) Give details of your climate-related engagement strategy with your customers.

**Type of engagement & Details of engagement**

| Education/information sharing | Share information about your products and relevant certification schemes (i.e. Energy STAR) |

**% of customers by number**
100

**% of customer - related Scope 3 emissions as reported in C6.5**
1

**Please explain the rationale for selecting this group of customers and scope of engagement**
Many of our customers are focused on emissions information and Scope 3 data. We work with our clients to provide them with such information related to Broadridge both as a company and with respect to the services we provide to our clients.

**Impact of engagement, including measures of success**
We respond to 100% of client requests regarding climate-related information.

(C12.1d)
(C12.1d) Give details of your climate-related engagement strategy with other partners in the value chain.

Broadridge supports a number of associate-led networks where associates with similar backgrounds and interests can find peer support, shape company policy and culture, receive mentorship from senior members, and develop their careers. Broadridge’s newest associate network, BeGreen, was founded in April 2023. The group’s mission is to engage all Broadridge associates that care about the environment to incorporate sustainability and a green mindset into their lives. BeGreen aims to provide a forum for associates to educate, encourage, and empower one another and provide practical steps we can take as individuals and within our communities to improve our sustainability. Events which the group has or will be looking to spearhead range from educational climate change panels, tree planting and environmental clean-up events.

We also engage with our employees during Earth Week and run numerous Earth Day awareness activities. These activities span the week encompassing April 22nd, featuring a different daily theme around environmental stewardship and awareness.

In certain locations, including our Edgewood and El Dorado Hills locations, we incentivize green travel among our employees. We have implemented electric vehicle charging stations at both production sites. Additionally, our partnership with Carpoolworld.com allows associates to sign up and find a commuting buddy in their area to travel to and from Broadridge workplaces. Any U.S.-based Broadridge associate is eligible to partake in our ride-share program. Broadridge also subsidizes a vanpool program with Enterprise and offer free rideshare programs through 50 Corridor for associates in its El Dorado Hills facility. Ridesharing reduces fossil fuel emissions and traffic congestion while providing alternative daily commuting options. Associates who ride-share are also eligible to register for our Travel Smart parking program. Our carpooling program reserves premium parking spots for registered associates. Environmentally friendly cars, as designated by New York State regulations, may also park in these coveted spaces.

C12.2

(C12.2) Do your suppliers have to meet climate-related requirements as part of your organization’s purchasing process?

No, but we plan to introduce climate-related requirements within the next two years.

C12.3

(C12.3) Does your organization engage in activities that could either directly or indirectly influence policy, law, or regulation that may impact the climate?

Row 1

External engagement activities that could directly or indirectly influence policy, law, or regulation that may impact the climate

Yes, we engage directly with policy makers

Yes, our membership of engagement with trade associations could influence policy, law, or regulation that may impact the climate

Does your organization have a public commitment or position statement to conduct your engagement activities in line with the goals of the Paris Agreement?

Yes

Attach commitment or position statement(s)

SBT-Commitment-Letter KG signed vFINAL.pdf

Describe the process(es) your organization has in place to ensure that your external engagement activities are consistent with your climate commitments and/or climate transition plan

Members of our leadership team and ESG Committee monitor climate-related regulations and governance of climate change, including best practices relating to climate-related strategy, goals and practices and new rules and regulations for climate disclosure. To the extent new best practices or regulations relating to climate arise, our leadership team and ESG Committee assess whether engagement is necessary to ensure they are consistent with our continually developing climate strategy and goals.

Primary reason for not engaging in activities that could directly or indirectly influence policy, law, or regulation that may impact the climate

<Not Applicable>

Explain why your organization does not engage in activities that could directly or indirectly influence policy, law, or regulation that may impact the climate

<Not Applicable>

C12.3a
(C12.3a) On what policy, law, or regulation that may impact the climate has your organization been engaging directly with policy makers in the reporting year?

Specify the policy, law, or regulation on which your organization is engaging with policy makers
Broadridge has been engaging with the SEC and other organizations on climate policy, specifically the SEC’s proposed climate disclosure rule. Senior leaders, including our Chief Legal Officer, have participated in industry groups on the topic.

Category of policy, law, or regulation that may impact the climate
Climate change adaptation

Focus area of policy, law, or regulation that may impact the climate
Planning

Policy, law, or regulation geographic coverage
National

Country/area/region the policy, law, or regulation applies to
United States of America

Your organization’s position on the policy, law, or regulation
Support with minor exceptions

Description of engagement with policy makers
Broadridge's Chief Legal Officer participates in meetings with the SEC and SEC Commissioners to express views on climate change disclosures.

Details of exceptions (if applicable) and your organization’s proposed alternative approach to the policy, law or regulation

Have you evaluated whether your organization’s engagement on this policy, law, or regulation is aligned with the goals of the Paris Agreement?
Yes, we have evaluated, and it is aligned

Please explain whether this policy, law or regulation is central to the achievement of your climate transition plan and, if so, how?
<Not Applicable>

C12.3b

(C12.3b) Provide details of the trade associations your organization is a member of, or engages with, which are likely to take a position on any policy, law or regulation that may impact the climate.

Trade association
Other, please specify (Society for Corporate Governance)

Is your organization’s position on climate change policy consistent with theirs?
Mixed

Has your organization attempted to influence their position in the reporting year?
Yes, and they have changed their position

Describe how your organization’s position is consistent with or differs from the trade association’s position, and any actions taken to influence their position
Broadridge is more supportive of climate change disclosure rules and Broadridge management attempts to influence the Society to be more supportive of the proposed climate change disclosure rules.

Funding figure your organization provided to this trade association in the reporting year (currency as selected in C0.4)
85000

Describe the aim of your organization’s funding
We funded approximately $85K in calendar year 2022 for membership fees and sponsorship of events related to Broadridge's business. The Company maintains memberships with a variety of trade associations for business and marketing purposes.

Have you evaluated whether your organization’s engagement with this trade association is aligned with the goals of the Paris Agreement?
Yes, we have evaluated, and it is aligned

C12.4
(C12.4) Have you published information about your organization’s response to climate change and GHG emissions performance for this reporting year in places other than in your CDP response? If so, please attach the publication(s).

**Publication**
In voluntary sustainability report
