Gender Pay Reporting

1. Executive Summary and Commentary

- Broadridge Financial Solutions Ltd currently has c 563 associates but this report reflects data from April 2022 with a headcount of 582. The business is predominately financial services technology and operations; Broadridge also has other group companies in the UK which do not meet the threshold for compliance.

- The business is approximately 26% female, 74% male, and Technology driven.

- Given the prevalence of male hires into technology roles there is a structural imbalance in the workforce with far more men in the top quartile pay band than women. This skews our gender pay gap.

- Hence the order in this report starts with pay bands and quartiles before reviewing pay and bonus gaps. All our team members are provided with a bonus scheme but may not have received a bonus within the year dependent on hiring date.

- The lack of senior female technologists and male dominated leadership is a focus area for Broadridge. We monitor our progress in hiring women and we regularly review our recruitment statistics to spotlight any gender pay gap issues at hire due to any imbalance of male senior hires. We are mindful of how to attract diverse talent. We have been much more successful at the entry level. We are also slowly improving senior female representation in the 3rd and 4th quartiles.

- We are looking to re-run a very well received Women’s leadership course to maximize women’s potential. In the past that has helped to prepare a number of high potential women for promotion. We also need to focus on senior women searches, and ensure our recruitment focuses on diversity.
• The proportion of women compared to men in all bands has improved, albeit slowly.

• There is an increase of 3.1% women in band D (Upper Quartile). We are still hiring proportionally more senior men than women and the focus is now on reviewing senior job specifications to consider a wider pool of applicants.
