

SEC rule 498A: Improve the investor experience and your bottom line

New SEC rules allow variable annuity and variable life insurance issuers to create **summary prospectuses**, making it easier for investors to understand contract features, fees and risks.

Old model: Onerous. Complicated. Confusing.

Today, variable annuity and variable life product issuers are required to inundate investors with a mountain of paper.

New model: Simple. Engaging. Accessible.

Rule 498A enables layered disclosure, minimizing paper, reducing costs and creating a better experience for investors.
