

# Sustainability Policy

## THE BROADRIDGE ENVIRONMENTAL COMMITTEE (BEC)

Engages enterprise-wide resources to institute corporate programs that promote a sustainable environment through efficient business initiatives and alternatives benefiting our clients, stakeholders and associates. Our environmental committee and this sustainability policy also serve to supplement Broadridge's Corporate Social Responsibility initiatives.

The objective of this sustainability policy is to clearly define the measures Broadridge has taken, and will continue to take, to identify and act upon opportunities to minimize Broadridge's environmental impact. Through the leadership of the BEC, Broadridge will continually review and implement initiatives to make positive changes in our operations.

The policy is overseen by Broadridge's Corporate Social Responsibility team, which ultimately reports to the Broadridge Executive Committee.

## ENVIRONMENTAL INITIATIVES AT THE BROADRIDGE U.S. LOCATIONS ARE GUIDED BY THE FOLLOWING PRINCIPLES:

**Associate Driven:** Broadridge understands that its associates are its greatest assets. Accordingly, Broadridge will promote awareness of environmental concerns among its associates and provide them with opportunities to become engaged in environmental sustainability initiatives. Through their passion to deliver results, associates can address environmental challenges that are important to Broadridge's businesses and the communities in which they live and work. Broadridge will share its best practices across its locations and strive to offer tools to associates to enable them to act in an environmentally responsible manner.

**Reduce Environmental Impact:** Broadridge will continue to consider ways to reduce waste and optimize business practices with the goal of reducing consumption of energy, water, and paper. Recycling programs are encouraged at all locations and associates frequently identify additional opportunities to reduce waste. Broadridge will strive to introduce and improve responsible environmental methods when determining operational and purchasing practices. Together with its suppliers, Broadridge will identify and implement new technologies to improve operational efficiencies and reduce its carbon footprint.

**Our Clients, Stakeholders and Providers:** Broadridge will partner with its clients and providers to offer efficient, secure and scalable solutions to the global financial industry while at the same time honoring our commitment to environmental responsibility. Continued emphasis on electronic solutions results in business opportunities that promote environmental sustainability and provide business benefits across our stakeholder community. Broadridge's leadership and associates recognize the value of understanding local challenges and the importance of implementing meaningful environmental solutions to Broadridge and its stakeholders.

**Measurements and Metrics:** Broadridge will focus on continual improvement in the area of managing and monitoring energy usage with an emphasis on communicating reduction strategies. Through our participation in the Carbon Disclosure Project, Broadridge gathers meaningful data and reports on it annually, providing objective evidence of our commitment to reduce our impact on the environment.
