INDEPENDENT AUDITOR'S REPORT

To the Trust Committee of Matrix Trust Company Collective Investment Trusts for Employee Benefit Plans

Opinion

We have audited the financial statements of Donaldson Sequoia Fund, one of the funds of Matrix Trust Company Collective Investment Trusts for Employee Benefit Plans (the "Fund"), which comprise the statement of financial condition, including the schedule of investments, as of May 31, 2025, and the related statements of operations, changes in participants' interest, and the financial highlights for the period from November 15, 2024 (commencement of operations) through May 31, 2025, and the related notes to the financial statements (collectively referred to as the "financial statements").

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as of May 31, 2025, and the results of its operations, changes in its participants' interest, and financial highlights for the period from November 15, 2024 (commencement of operations) through May 31, 2025, in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinion

We conducted our audit in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Fund and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Fund's ability to continue as a going concern for one year after the date that the financial statements are issued.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood

that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Fund's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

A handwritten signature in dark ink that reads "Deloitte & Touche, LLP." The signature is written in a cursive, flowing style.

Matrix Trust Company Collective Investment Trusts for Employee Benefit Plans

Donaldson Sequoia Fund

Notes To Financial Statements

For the Period from November 15, 2024 (Commencement of Operations) to May 31, 2025.

1. Organization

The Donaldson Sequoia Fund (the Fund) is a collective investment fund established under the Amended and Restated Declaration of Trust of the Matrix Trust Company Collective Investment Trusts for Employee Benefit Plans (Declaration of Trust) to provide for the collective investment and reinvestment of assets of qualified employer sponsored retirement plans. Matrix Trust Company (referred to herein as the Trustee) serves as the trustee, custodian, transfer agent, and recordkeeper for the Fund. While the Trustee maintains all management authority, Donaldson Capital Management, LLC (referred to herein as the Sub-Advisor) provides investment sub-advisory services for the Fund.

The following describes the Fund and its investment objective, as set forth in the Fund Declaration established under the Declaration of Trust:

Donaldson Sequoia Fund— The Fund is intended to be a portfolio with a quantitatively managed strategy designed to own large companies that have sustainable competitive advantages and significant growth potential. The Subadvisor uses a quantitative process to select approximately 20 stocks based on high conviction institutional ownership and the Subadvisor's proprietary algorithm. The Fund is non-diversified.

The Fund Commenced operations on November 15, 2024.

2. Summary of Significant Accounting Policies

The following is a summary of the significant accounting policies followed by the Fund in the preparation of the financial statements.

Principles of Accounting—The financial statements have been prepared in accordance with generally accepted accounting principles (GAAP), as established by the Financial Accounting Standards Board (FASB), to ensure consistent reporting of financial condition and results of operations. The Fund each meet the definition of an investment company and therefore follow the investment company guidance in FASB Accounting Standards Codification (ASC) Topic 946, Financial Services – Investment Companies.

Use of Estimates—The preparation of financial statements in conformity with GAAP requires the Fund's Trustee to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements, and the reported results of operations during the reporting period. Estimates include determination of fair value of investments. Actual results could differ from those estimates.

Cash and Cash Equivalents—The Fund considers all highly liquid instruments with original maturities of three months or less at the acquisition date to be cash equivalents. Cash balances of the Fund pending investment or disbursement may be placed overnight into a deposit account provided by an affiliate of the Trustee. The balance held on behalf of a Fund in the deposit account may be in excess of federally insured limits; however, management of the Fund does not believe the Fund is exposed to any significant credit risk.

Investment Valuation—The Fund records investments at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The Fund's utilizes valuation techniques to maximize the use of observable inputs and minimize the use of unobservable inputs. Assets and liabilities recorded at fair value are categorized within the fair value hierarchy based upon the level of judgment associated with the inputs used to measure their value. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). Inputs are broadly defined as assumptions market participants would use in pricing an asset or liability.

The three levels of the fair value hierarchy are described below:

Level 1—Unadjusted quoted prices in active markets for identical assets or liabilities that the Fund has the ability to access at the measurement date. The Fund does not adjust the quoted price for these investments, even in situations where the Fund holds a large position and a sale could reasonably impact the quoted price.

Level 2—Inputs other than quoted prices within Level 1 that are observable for the asset or liability, either directly or indirectly. A significant adjustment to a Level 2 input could result in the Level 2 measurement becoming a Level 3 measurement.

Level 3—Inputs are unobservable for the asset or liability and include situations where there is little, if any, market activity for the asset or liability. The inputs into the determination of fair value are based upon the best information in the circumstances and may require significant management judgment or estimation.

As of May 31, 2025, the Fund's investments are valued using Level 1 inputs.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. The Fund's assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment and takes into consideration factors specific to the investment. The inputs or methodology used for valuing investments are not necessarily an indication of the risks associated with investing in those investments.

A description of the valuation techniques applied to the Fund's major categories of assets measured at fair value on a recurring

Stocks— Stocks are measured at fair value on a recurring basis using Level 1 inputs based on quoted prices for identical assets in active markets as of the measurement date. The inputs or methodology used for valuing investments are not necessarily an indication of the risks associated with investing in those investments.

Investment Transactions and Dividends—Investment transactions are recorded on the trade date. Realized gains and losses on investment transactions are determined on the average lot cost method and are included as net realized gain or loss on investments in the accompanying statement of operations. The difference between the cost and the fair value of open investments is reflected as unrealized appreciation (depreciation) on investments, and any change in that amount from the prior period is reflected in the accompanying statement of operations. Dividend income is recognized on the ex-dividend date.

Federal Income Taxes— The Fund is established hereunder is intended to qualify as a group trust under Revenue Ruling 81-100, 1981-1 C.B. 326, issued by the Internal Revenue Service, as clarified and modified by Revenue Ruling 2004-67, 2004-2 C.B. 28, Revenue Ruling 2011-01, 2011-2 I.R.B. 251. As a result, the Fund is exempt from federal income taxes under provisions of section 501(a) of the Internal Revenue Code.

The FASB provides guidance for how uncertain tax positions should be recognized, measured, disclosed and presented in the financial statement. This requires the evaluation of tax positions taken or expected to be taken in the course of preparing the Fund's tax returns to determine whether the tax positions are "more likely than not" to be sustained "when challenged" or "when examined" by the applicable tax authority. Tax positions not deemed to meet the more likely than not threshold would be recorded as a tax benefit or expense and liability in the current period. As of May 31, 2025, and for the period ended, management has determined that there are no material uncertain tax positions. The Fund files income tax returns in U.S. federal jurisdiction. The current period generally remains subject to examination by U.S. federal tax authorities for three years.

Participant Transactions—The unit values of the Fund are determined at the close of each business day that the New York Stock Exchange is open for business. Units may be issued and redeemed on any business day at the daily unit value. All earnings, gains, and losses of the Fund are reflected in the computation of the daily unit value and are realized by the participants upon redemption from the Fund. Net investment income and net realized gains are reinvested, and thus, there are no distributions of net investment income or net realized gains to participants.

3. Purchases, Sales, and Realized Gain (Losses) of Underlying Investments

For the period ended May 31, 2025, the aggregate cost of purchases, proceeds from sales and realized gains (losses) of underlying investments were:

	Purchases	Proceeds from Sales	Net Realized Gain (Loss) on Investments
Donaldson Sequoia Fund			
U.S. Stock	6,313,064	945,745	24,809
International Stock	302,890	30,782	2,491
Donaldson Sequoia Fund Total	6,615,954	976,527	27,300

4. Subsequent Events

Management has determined there are no subsequent events or transactions through the date the financial statements were issued that would have materially impacted the financial statements as presented.

5. Related Party Transactions and Fees

The cash component for the Fund is held in a bank depository account maintained by the Trustee for retirement account customers.

In the event the audit fees to exceed .05 percent of average participants' interest annually, the sub-advisor will assume such excess audit fees. For the period ended May 31, 2025, the sub-advisor assumed \$4,690 in audit fees recorded as Assumed Audit Fee on the Statement of Operations.

The Trustee charges the Fund a fee in accordance with a tiered fee schedule (below) based on net assets held by external participants in the collective investment funds (CIF) with a common sub-advisor. The fee for the period ended May 31, 2025, was .10 percent per annum of net assets.

This fee accrues on a daily basis and is payable monthly in arrears.

Net CIF Assets	Fee
\$0 - \$100,000,000	0.10%
\$100,000,001 – \$200,000,000	0.08%
\$200,000,001 – and above	0.06%

6. Risks and Indemnifications

As of May 31, 2025, a significant amount of beneficial interest in the Fund is held by a single plan sponsor. This concentration exposes the Fund to risk associated with the potential withdrawal or redemption of the investor's interest. Should the investor choose to redeem its entire position, the Fund may be required to liquidate investments rapidly, which could adversely affect the Fund's net asset value and its ability to meet redemption requests in an orderly manner. The Trustee monitors liquidity and maintains policies designed to manage redemption risk; however, the presence of a single investor increases the Fund's exposure to concentration risk compared to a more diversified investor base.

In the normal course of business, the Fund enters into contracts that contain a variety of representations and warranties that provide indemnification under certain circumstances. The Fund's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Fund that have not yet occurred. The Fund expects the risk of future obligation under these indemnifications to be remote.
