Operations Information

Net Assets - Share Class	220,000
Inception Date	7/5/2023
Turnover Ratio %	51.83

*No commissions or redemption fees charged for purchases and sales of interests in the fund

Investment Strategy

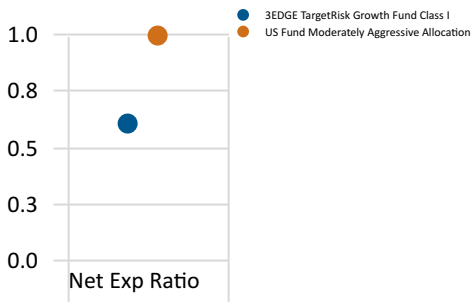

The 3EDGE TargetRisk Growth Fund (the "Growth Fund") is a globally diversified, multi-asset portfolio invested across a wide variety of asset classes and geographies. Investment exposure is achieved primarily through the use of index exchange traded funds (ETFs). The investment objective is to seek to generate long-term capital appreciation over full market cycles but with a lower risk profile in terms of volatility and maximum drawdown than a traditional all-equity portfolio. An appropriate time horizon for the Growth Fund would be more than 10 years, at least for this component of an investor's overall liquid assets.

Investment Philosophy

3EDGE focuses exclusively on top down, portfolio allocation to create globally diversified portfolios. 3EDGE's goal is to generate attractive, risk-adjusted returns over full market cycles by making investments in undervalued asset classes that are poised to begin a period of market outperformance due to identified catalysts. 3EDGE believes that markets tend to be relatively micro-efficient and macro-inefficient. This means that oftentimes market indices tend to outperform individual security selection due to wide dissemination of information about publicly traded securities. However, when investing across asset classes and geographies at the index level there is far less information available and herein lies the opportunity. Since asset classes at the index level are part of a complex, non-linear, dynamic system they tend to be more difficult to understand and therefore they are generally more apt to be mispriced than individual securities.

Expense Relative to Peer Group

Peer Group (5-95%): Separate Accounts - U.S. - Moderately Aggressive Allocation
