## Investment Strategy

The Donaldson Rising Dividend Cornerstone Fund is a diversified portfolio of companies with market capitalizations of greater than \$10 billion. The Fund seeks to generate income and long-term capital appreciation by investing in companies that have consistently paid and increased their dividend over time. The fund will invest exclusively in equities with up to a 3% allocation to cash or cash equivalents for liquidity purposes.

## Investment Philosophy

The philosophy of the DCM Rising Dividend Cornerstone strategy is to provide a growing dividend income stream by investing in high-quality, conservatively financed businesses with strong economic characteristics and a demonstrated commitment to returning cash to shareholders. DCM believe that as dividends increase year-after-year, this exerts an upward pressure on the stock price and these growing dividends will eventually lead to capital appreciation, therefore providing their clients with an attractive total return with less downside risk relative to broad US market benchmarks. This is summarized into three principle components - capital preservation and income, leading to long-term growth.
