Fee per \$1,000 \$3.00

*Fee per \$1000 is assuming no return and based on total net expense for one year

Operations Information

Net Assets - Share Class 34,820,000
Inception Date 6/30/2020
Turnover Ratio % 14.05

*No commissions or redemption fees charged for purchases and sales of interests in the fund

Investment Philosophy

The Matrix Trust Company GoalPath Portfolios are designed to manage risks that face retirement plan investors when it comes to replacing their income. The GoalPath Portfolios take into account the transfer of human capital (current and future earnings power) to financial capital (retirement savings) over time. As retirement approaches, the GoalPath Portfolios recognizes this shifting risk and gradually change their asset allocation, holding more growth-focused assets (stocks and bonds) when an investor is many years away and more inflation protected hedged income securities (TIPS) as the target retirement date approaches. Conceptually, you can think of this process as systematically investing and accumulating "slices of retirement income"—a stream of inflation-adjusted annual income throughout retirement. By seeking to manage the relevant risks, we aim to increase clarity for investors as they plan for retirement, and to enable the delivery of meaningful information to help participants and plan sponsors better assess retirement readiness.

Investment Strategy

The GoalPath 2040 Conservative Enhanced Index Portfolio focuses on growth consistent with its target retirement date and, as it approaches its target date, management of retirement income risk. It seeks to allocate between enhanced index fixed income and enhanced index equity growth investments to balance income risk management against the opportunity to grow expected retirement income. An "enhanced index" fund is a fund that seeks to enhance the returns of an index by using active management to modify the weights of holdings for additional return. The overall effect of interest rate fluctuations and equity market performance may impact the ability to achieve a desired level of retirement income. The portfolio may be appropriate for investors with a lower risk tolerance and a planned retirement date on or about 2040. The portfolio invests in an allocation of global equities, global fixed income, and treasury inflation protected securities by investing in mutual funds, collective investment funds, exchange-traded funds and other pooled investment vehicles. The portfolio will initially allocate approximately 86% of assets in global equities, 14% in global fixed income, and initially 0% in treasury inflation protected securities. As the portfolio's target date approaches the global equities and fixed income allocation will be reduced and allocated to treasury inflation protected securities, reaching its most conservative allocation of approximately 25% global equities on or about its target retirement date.
