\*Fee per \$1000 is assuming no return and based on total net expense for one year.

## Portfolio Construction

The Real Asset Fund is an asset allocation fund whose primary objective is income and stability. It is designed for investors concerned about the prospect of rising inflation. The Fund is invested in a diversified mix of underlying vehicles including mutual funds, ETFs, stable value and other pooled funds. The Real Asset Fund typically invests 25% of its assets in stable investments, 25% in bonds, a portion of which is allocated to international bonds, 25% in real estate, a portion of which is allocated to real estate and REITs, and 25% in commodities and natural resources. Tactical changes may be made to take advantage of valuation opportunities from time to time. To ensure the Fund's strategy remains consistent, the allocation may be rebalanced when it deviates significantly from strategic targets. Investors in this fund should be willing to accept modest fluctuation in value and be able to tolerate the market risk that comes from the volatility of capital markets.

The underlying investments will use a combination of passive and active strategies and will be evaluated on a regular basis.
