Portfolio Construction

The Retirement Advocate Moderately Conservative Fund is a diversified asset allocation fund that invests in a mixture of equities, fixed income instruments, and alternative strategies through mutual funds, ETFs, or other pooled funds. The primary investment objective of the Moderately Conservative Fund is moderate risk (as measured by volatility) with some growth. The Moderately Conservative Fund will typically have a heavier weighting to fixed income instruments, with the balance allocated to equities (both domestic and international). The Fund also may utilize alternative strategies to help it pursue its investment objectives. Up to 40% of the Fund's assets may be invested in equities or alternative strategies. The Fund may use both passive and active investment options. As financial markets and holdings fluctuate in value, the Fund is rebalanced to maintain its target asset allocation.

Investment Philosophy

The Retirement Advocate Fund series includes five distinct and broadly diversified CIFs. Each CIF has a different risk/reward profile as measured by volatility. Each strategy is based on a strategic asset allocation using multiple asset classes and strategies. Moneta deploys an investment philosophy that creates diversification, and does not attempt to time the market. Moneta couples this approach with disciplined rebalancing while continually managing the fees and expenses of the funds.

Expense Relative to Peer Group

Peer Group (5-95%): Separate Accounts - U.S. - Moderately Conservative Allocation

SubAdvisor			About Risk	
Moneta Group Investment Advisor, LLC ("Moneta") will provide sub-advisory services to the Retirement Advocate Fund series, which includes five distinct and broadly diversified CIFs. For more information on Moneta visit www.monetagroup.com .			There is no assurance that the stated objective of a particular CIF will be achieved. The potential risks applicable to the CIFs include, but are not limited to the following:	
Trustee and Management Fee			Market Risk. CIFs are subject to market risk, which is the chance that the value of the investments in the CIF may decline over time, causing a reduction in the value of the CIF. Stock markets tend to move in cycles, with periods of falling stock prices. Bond markets also usually move in cycles, with bond values being inversely related to the changes in interest rates. As interest rates rise, the value of a bond tends to decrease, and as interest rates declines, the value of a bond tends to increase.	
There are no sales commissions or redemption fees charged for purchases and sales of interests in the Funds.			Foreign Market Risk. A CIF that invests in funds holdings foreign securities may also be subject to the risk of investment in foreign markets. Investing in foreign markets can involve a greater level of risk, as there is often a lower degree of market volume and liquidity than in the U.S. markets, and this may result in higher price volatility. In addition, currency risk must also be considered. Foreign securities are denominated in foreign currencies, which may change in value in relation to the U.S. dollar, possibly for long periods of time. When a foreign currency declines in value in relation to the U.S. dollar, the return on foreign investments may likewise decline. Foreign governments may also intervene in currency markets or impose approval or registration processes, which could adversely affect the value of the CIF.	
Annualized Fees as of 05/31/2023:			Real Estate Risk. A CIF that invest in funds holding real estate securities (e.g., REITs) involves many of the risk of investing directly in real estate such as declining real estate values, changing economic conditions and increasing interest rates, which could adversely affect the value of the CIF.	
Trustee Fee		0.03%	Commodity Risk. A CIF that invest in funds holding commodity investments is subject to commodity price fluctuations. Commodity prices generally fluctuate in relation to, among other things, the cost of producing commodities, changes in consumer demand for commodities, hedging and trading strategies of commodity market participants, disruptions in commodity supply, weather, as well as political and other global events, which could adversely affect the value of the CIF.	
Management Fee (Underlying Investments)		0.38%	Small- and Mid-Cap Risk. A CIF that invest in small-capitalization and mid-capitalization companies may be subject to price volatility. The securities of both small capitalization and mid capitalization may trade less frequently and in smaller volume than larger, more established companies. Accordingly, their performance can be more volatile and they face greater risk of business failure, which could, depending on the allocation of the CIF's assets to such sectors, increase the volatility of a CIF's performance.	
Audit Fee		0.00%	A particular CIF may or may not contain one or more of the asset types described above. Please refer to the asset allocation above.	
Qualified Custodian Fee		0.00%		
Total Fund Operating Expense:		0.41%		
The Funds will invest in a combination of mutual funds, ETFs, and other pooled funds that charge asset management fees (the "Management Fee"). The Management Fee is an additional cost incurred by and deducted from the daily net asset value of the underlying mutual fund, ETF, or commingled fund.				
Additional Information				
Data provided is for general informational purposes only is not intended to be used for auditing purposes and may not represent a complete accounting of all holdings within the portfolio. The information should not be considered as investment, legal, accounting, or tax advice or a recommendation of any particular security, strategy, or investment product and it does not take into account the investment objectives, financial situation, or needs of any particular investor. Investors should consider whether the Collective Investment Fund ("CIF") is suitable for their particular circumstances and, if necessary, seek professional advice before investing.				
The data is current as of the date listed, and is subject to change without notice. While generally deemed reliable, it has not been verified for accuracy or calculation methodologies and the accuracy of the data cannot be guaranteed.				
Units in CIFs are not deposits or obligations of, or endorsed or guaranteed by, Matrix Trust Company or its affiliates, and the units are not insured by the Federal Deposit Insurance Corporation ("FDIC") or any other independent organization. The CIFs are also subject to investment risks, including possible loss of the principal amount. There is no assurance that the stated objective of a particular CIF will be achieved. CIFs maintained by Matrix Trust Company are designed to serve the investment needs of tax-qualified retirement plans. The CIFs are not mutual funds registered under the Investment Company Act of 1940, as amended, ("1940 Act"), and CIF unit holders are not entitled to the protections of the 1940 Act. In addition, the CIFs' units are not securities required to be registered under the Securities Act of 1933, or applicable securities laws of any state or other jurisdiction.
